

We Learn. We Build. We Play.

AFTER SCHOOL

So fun... it won't feel like learning!!

IMMACULATE CONCEPTION SCHOOL ENRICHMENT CLASSES FOR 1ST - 4TH GRADES

Spring is Here!

A great time to study
LIFE SCIENCES

We will focus on biology in our **LIFE SCIENCES** theme for the spring session.

The students will learn about and build Caterpillars, Butterflies, a Venus Flytrap, a Dragonfly, a personal fan (cooling our bodies) and even a dinosaur. Spring time is a great time to learn what are caterpillars and how do they become butterflies (and moths). What could be more interesting than an herbivore plant like a Venus Flytrap (ours does shut to capture its prey).

And as the outdoor activities increase and the temperatures rise, some basic understanding of the function of our skin and how we cool our bodies is quite timely. As far as the dinosaur, well we will let your children explain how that relates to the overall **LIFE SCIENCES** theme.

Sibling (ONLY) 10% discount code: TFRXVEQHSSMVUZOH

Tuesdays 3:15– 4:15pm

Cost: \$99.00 for a 6-week session

Class dates: April 9th, 16th, 30th , May 7th,
14th & 21st
