

Turner syndrome (TS) occurs in approximately one out of every 2,000- 4,000 female live births. It is a chromosomal condition describing girls and women with common features, physical traits and other medical conditions

February 22, 2019

\$1.00 Purple Dress
Down Day!

Please consider donating to The Turner Syndrome Society. Your donations will help create awareness of TS across the nation, to promote TS research conducted by clinicians, and to support every life touched by TS through local groups, national conference, website resources, and more.

To learn more about TS please visit
