

**All Saints Catholic School- Guidelines for Medication:**

The ASCS medication policy was developed to provide us with safe and effective guidelines for administering medications, which are given out by trained office staff. Medications can be given in school when it is medically necessary for the child in order to attend school.

A few highlights of the policy include:

- Medications must be delivered in its original container, with prescription label when applicable.
- Parents must transport medications to the school and transport them home when medications are no longer needed.
- All medications must be accompanied by an ASCS permission form signed by the doctor and parent. These forms are available at the school or on our web page on the following link.

<https://www.allsaintsmaine.org>

We ask that you assist us in limiting medications in the school to those which are considered medically necessary as part of your child's doctor's plan of care. The office staff will be happy to discuss any aspects of the medication policy with you.

God's blessings on you and your family,

A handwritten signature in black ink that reads "Matthew Houghton". The signature is written in a cursive, flowing style.
